

Regression Plane Equation:

$$\begin{aligned} \text{SOC} = & -9.14 \\ & + 0.751 \times (\text{Year} - 2007) \\ & + 0.0581 \times \text{Altitude} \end{aligned}$$

Model Performance:

$R^2 = 0.246$
(Explained variance: 24.6%)

Statistical Significance:

Intercept: ***
($p = 0.00\text{e}+00$)

Year Effect: ***
($p = 0.00\text{e}+00$)

Altitude Effect: ***
($p = 0.00\text{e}+00$)

Significance Codes:

*** $p < 0.001$ (highly sig.)
** $p < 0.01$ (very sig.)
* $p < 0.05$ (significant)
ns (not sig.)

Interpretation:

Base SOC (2007):
-9.14 g/kg

Temporal Change:
+0.751 g/kg/year

Altitudinal Gradient:
+0.0581 g/kg/meter
